

Satellite radio has been a neccessity for me on traffic and weather. I travel alot and it has been get to have such a great resource. I am paying for these services and expect to continue to benefit from it. It should not be up to the National Association of Broadcasters to dicate what I should be permitted to hear. Respectfully reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.
